

NamedDataParser

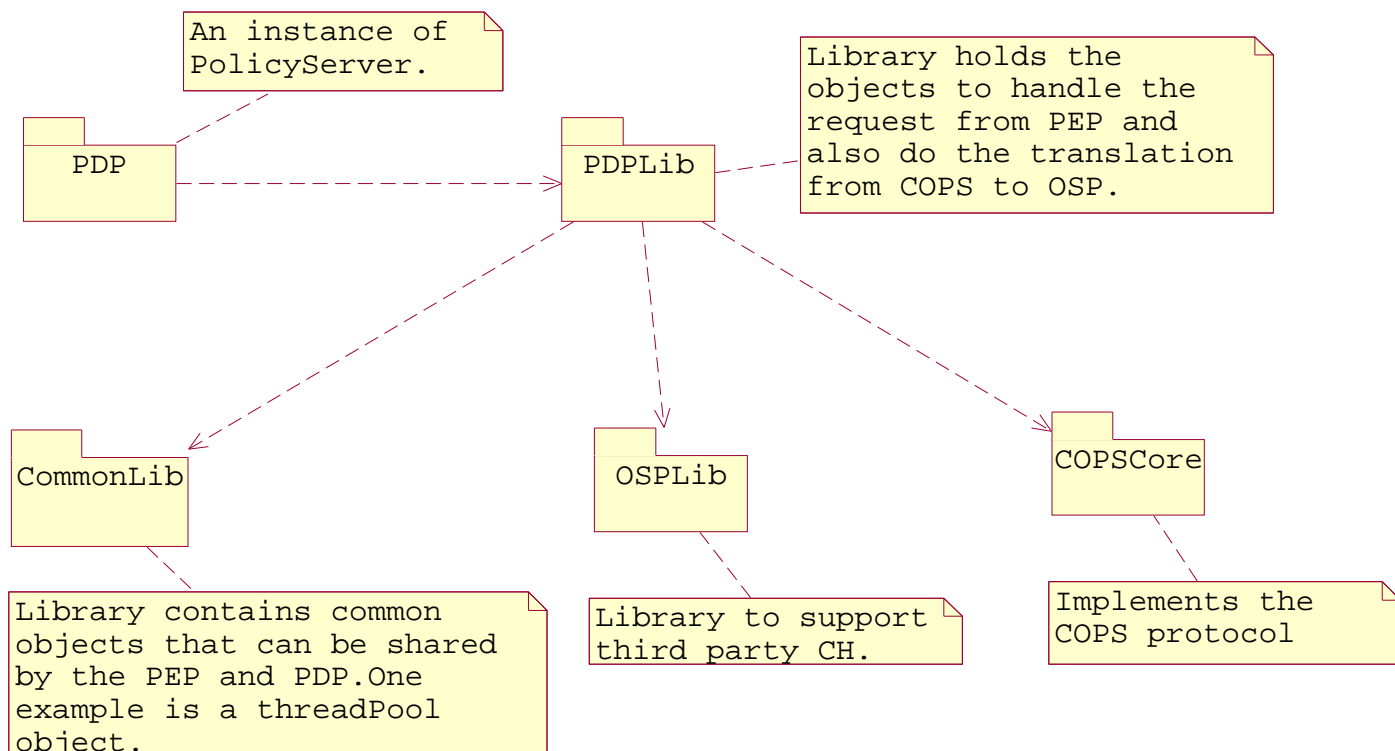

Takes a COPSClientSI vector, parses the data and save it in the key value pair.

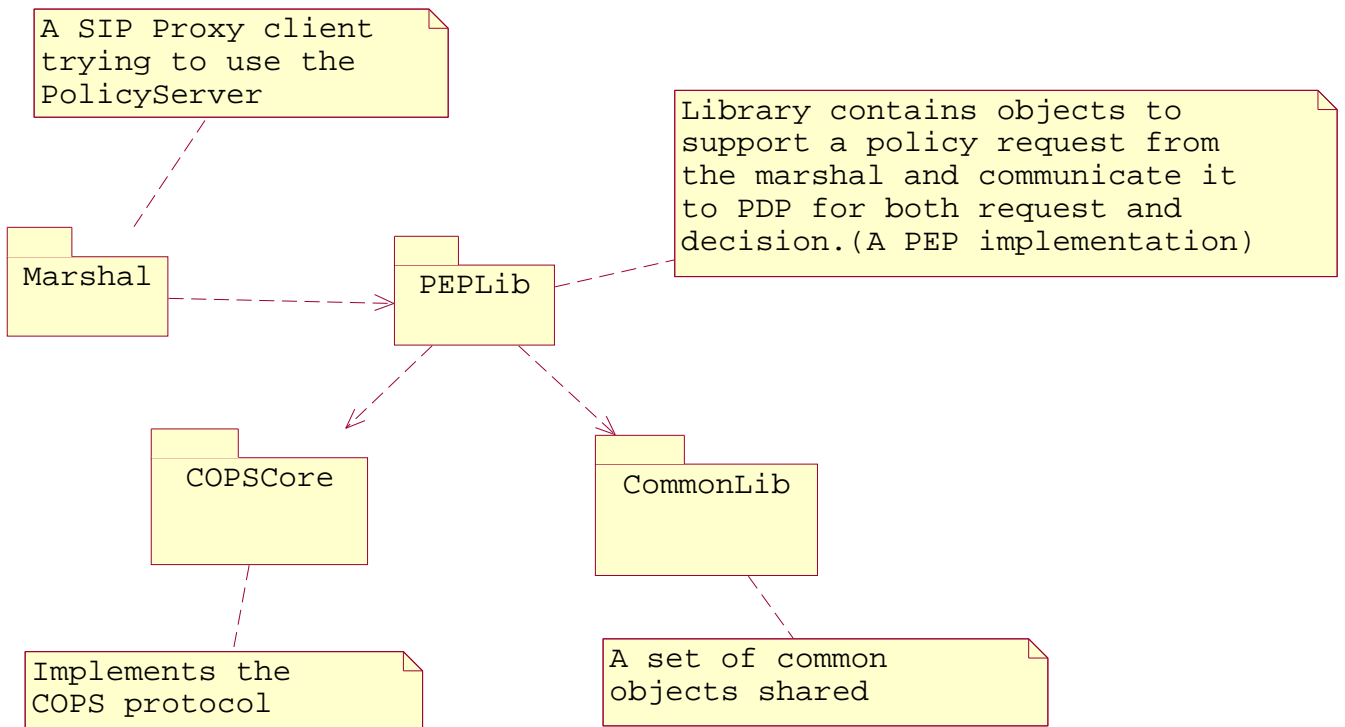

For example data
User|aUser@vovida.com
will be saved in key "User" with value
"aUser@vovida.com"

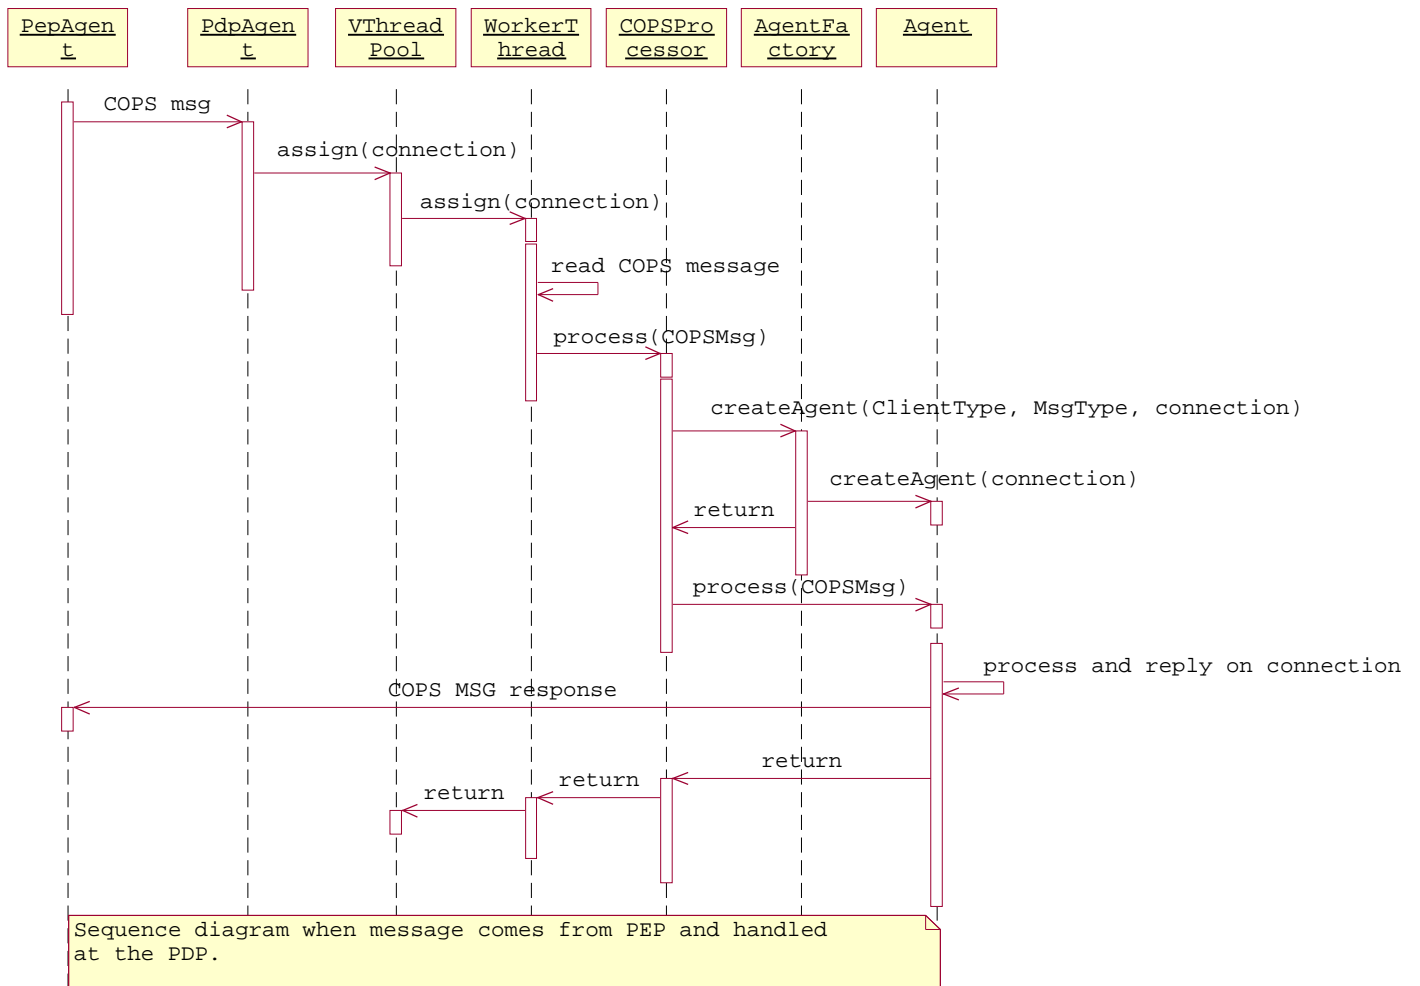

KeepAliveAgent

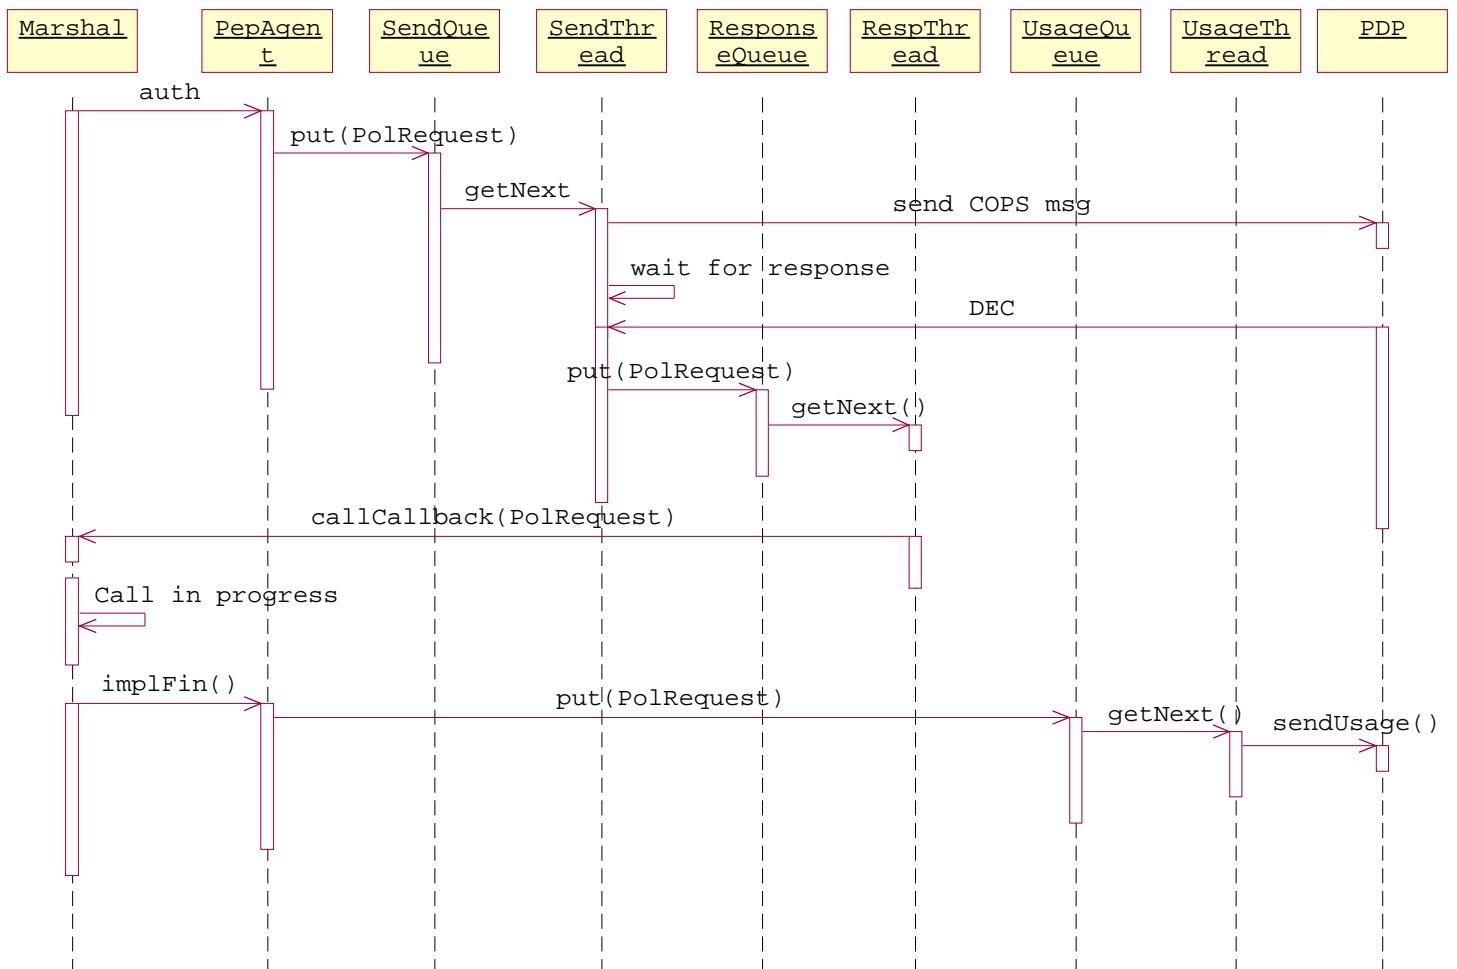

Runs in a separate thread. Send a Keep-alive message to all PEPs those are connected.

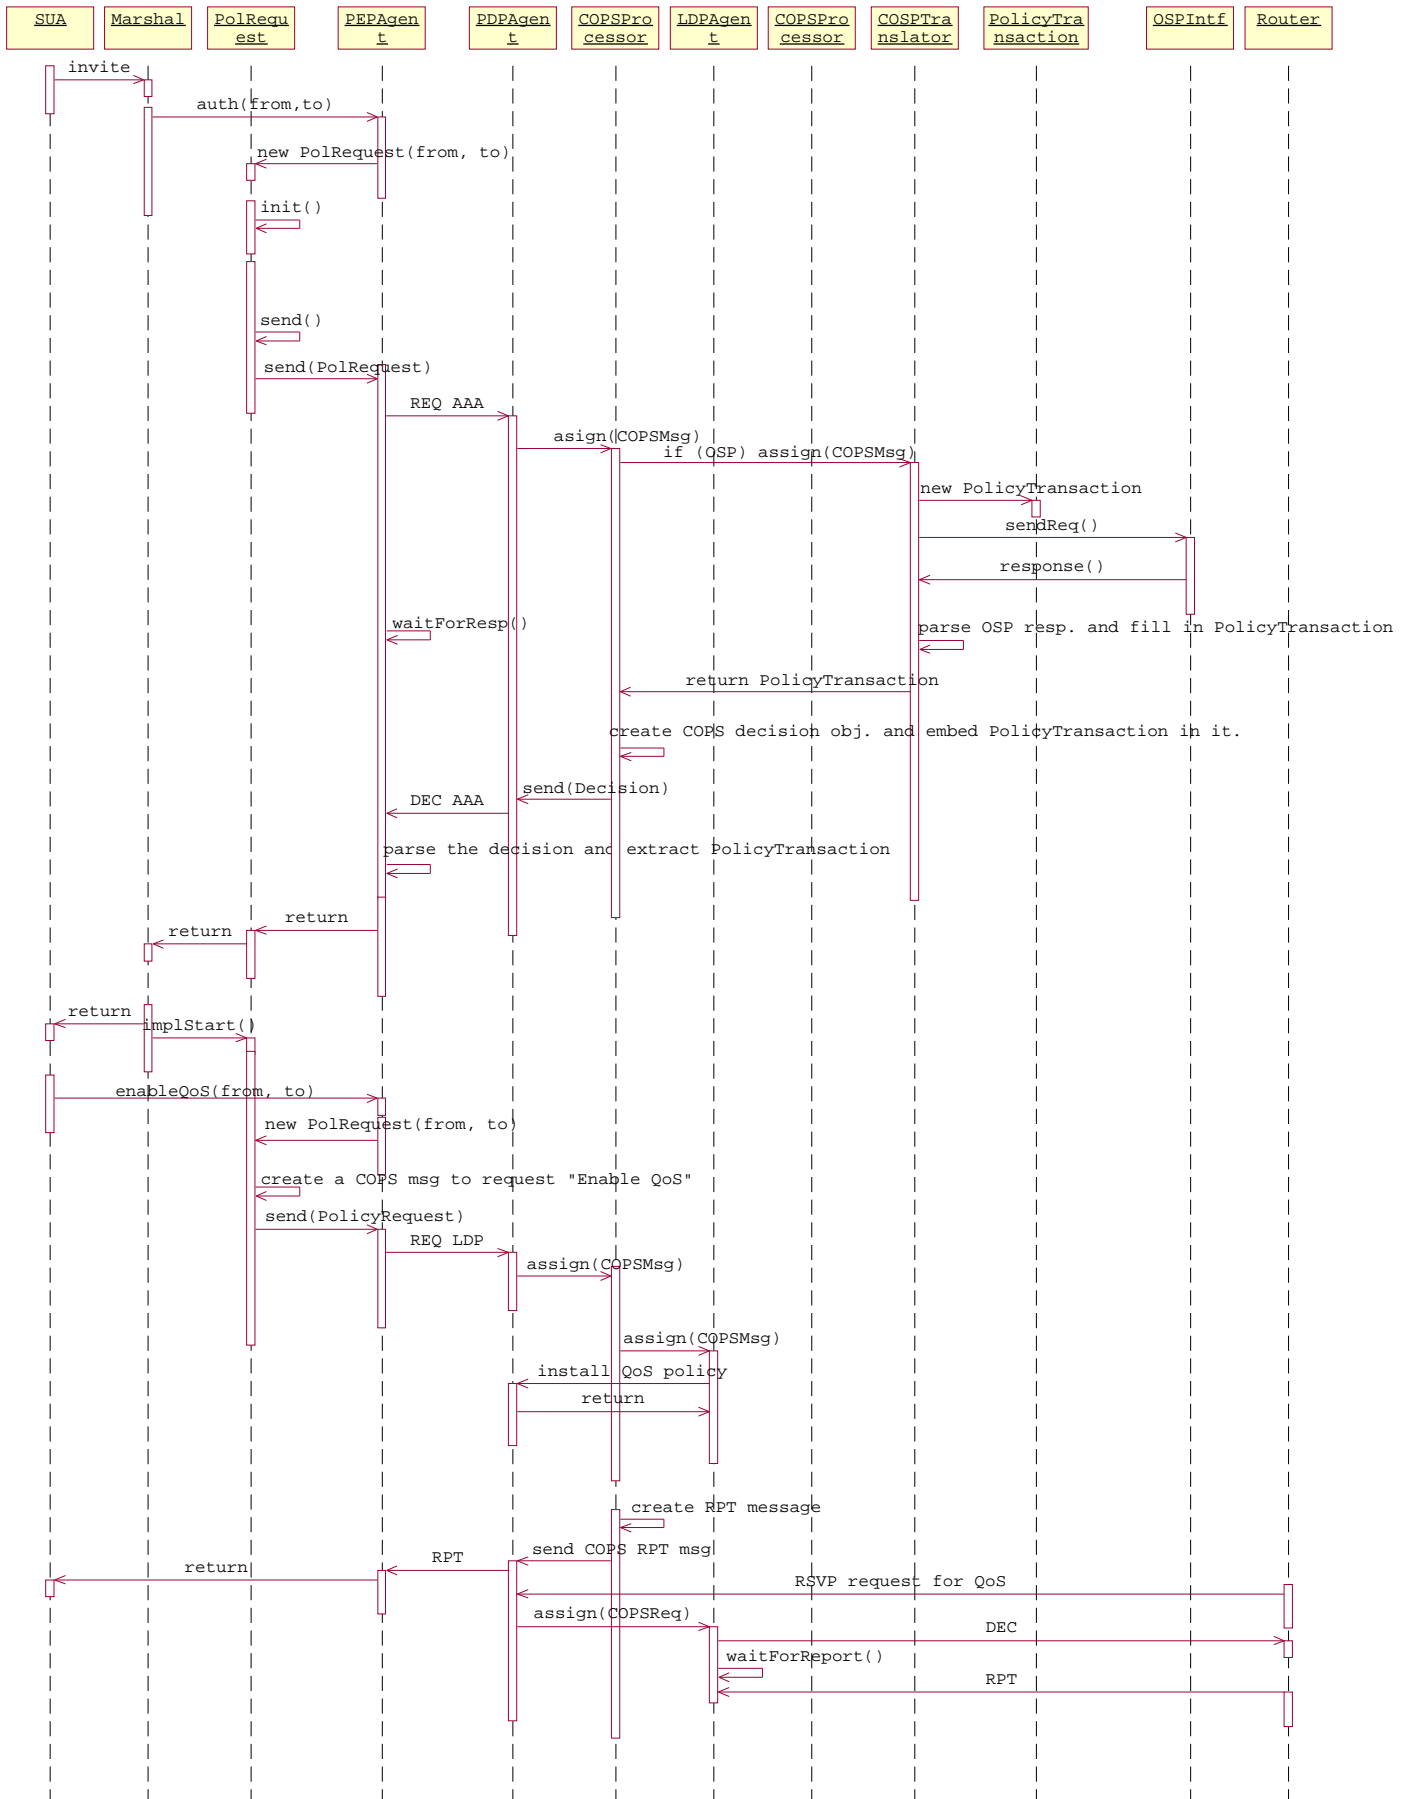

Sequence diagram for Marshal making request to PEP lib.

Sequence diagram when a request is made from Marshal for authorization.
